| | A | B |
|---|---|---|
| 1 | **Purpose** | Diagnose the decline in Furniture gross margin from the third to the fourth quarter of fiscal 2026, as requested by the controller. |
| 2 | **Source** | C:\CharlesRiver\CharlesRiver.xlsx: Tables T16_SalesInvoice, T17_SalesInvoiceLine, T44_Item, T7_PromotionProgram, imported with Power Query. |
| 3 | **Query steps** | Item keeps only items with a list price, and eleven columns. SalesInvoice has its date columns set to the Date type. FreightAmount and Discount have the decimal number type in their Changed Type steps. The other queries keep every row and column. |
| 4 | **Last refreshed** | Date of the last Refresh All |
| 5 | **Parameters** | ThresholdPercentile (Parameters!B3, an input validated between 0.5 and 0.99); LargeLineThreshold (Parameters!B4, a formula). |
| 6 | **Calculated columns** | SalesInvoiceLine: ListAmount =ROUND([@Quantity]*[@BaseListPrice],2); DiscountAmount =ROUND([@Quantity]*[@UnitPrice]*[@Discount],2). |
| 7 | **Worksheets** | Documentation; SalesInvoice, SalesInvoiceLine, Item, and PromotionProgram (data loaded by queries); Parameters; Analysis (control totals and the summary grid). |
| 8 | **Conventions** | Blue font marks input cells; black font marks formulas. |
| 9 | **Prepared by** | Staff accountant, with the date prepared |
| 10 | **Reviewed by** | |
| 11 | **Open questions** | Promotion 8, the Furniture Seasonal Promotion (PROMO-2026-008, 10%, 2026-09-01 to 2026-10-31), has the most promotion lines and the most discount dollars. Its dates straddle the two quarters under review. Its effect on Furniture prices in each quarter cannot yet be measured, because the invoice lines carry no invoice date or item group. |

**Documentation** | SalesInvoice | SalesInvoiceLine | Item | PromotionProgram | Parameters | Analysis

*Outlined: the open question that the rest of Part II takes up.*
