Delivered quote
price plus inbound freight, per unit
Is it below **materials plus factory overhead**, the cost that stops even if the crew stays?
Yes
Buy, if the terms, quality, and minimum volume are acceptable and two years of savings cover the tooling
No
Is it below that cost **plus the crew time** the family uses?
Yes
No
Will the crew be **reduced in step** with the hours freed?
Yes
Buy, with the crew plan, if two years of savings cover the tooling and severance, on the same terms
No
Keep making, unless the freed hours have another use: buying adds cost while the crew stays; test the price too
Keep making, and test the price against the margin floor
Below the floor? Reprice, and weigh the volume the increase could cost
