

1 Documentation

Purpose, source file and query steps, parameters, worksheets, conventions, preparer and reviewer, open questions. First worksheet in the workbook; describes every layer below.

CharlesRiver.xlsx

Source, never edited

T16_SalesInvoice
T17_SalesInvoiceLine
T44_Item
T7_PromotionProgram

Power Query:
recorded steps;
Refresh All
repeats them

2 Data worksheets

One Table per worksheet, loaded by a query:
SalesInvoice
SalesInvoiceLine (with calculated columns)
Item
PromotionProgram
Nothing else on these sheets.

structured
references

4 Analysis

Control totals, summary grid,
SUBTOTAL results.
Formulas use structured references to
the Tables and names for the
parameters.

3 Parameters

Named, validated inputs:
ThresholdPercentile (input)
LargeLineThreshold (formula)

named cells

Numbers give the order of the worksheet tabs. Gray marks the external source; blue and teal mark worksheets in the analysis workbook.
