

	A	B
1	Workbook documentation	
2	Purpose	Diagnose the decline in Furniture gross margin from the third to the fourth quarter of fiscal 2026, as requested by the controller.
3	Source	CharlesRiver.xlsx: Tables T16_SalesInvoice, T17_SalesInvoiceLine, T44_Item, T7_PromotionProgram, imported with Power Query.
4	Query steps	Item keeps only items with a list price, and eleven columns. SalesInvoice has its date columns set to the Date type. The other queries keep every row and column.
5	Last refreshed	Date of the last Refresh All
6	Parameters	ThresholdPercentile (Parameters!B3, an input validated between 0.5 and 0.99); LargeLineThreshold (Parameters!B4, a formula).
7	Calculated columns	SalesInvoiceLine: ListAmount =ROUND([@Quantity]*[@BaseListPrice],2); DiscountAmount =ROUND([@Quantity]*[@UnitPrice]*[@Discount],2).
8	Worksheets	Documentation; SalesInvoice, SalesInvoiceLine, Item, and PromotionProgram (data loaded by queries); Parameters; Analysis (control totals and the summary grid).
9	Conventions	Blue font marks input cells; black font marks formulas.
10	Prepared by	Staff accountant, with the date prepared
11	Reviewed by	
12	Open questions	Promotion 8, the Furniture Seasonal Promotion (PROMO-2026-008, 10%, 2026-09-01 to 2026-10-31), has the most promotion lines and the most discount dollars. Its dates straddle the two quarters under review. Its effect on Furniture prices in each quarter cannot yet be measured, because the invoice lines carry no invoice date or item group.

Documentation	SalesInvoice	SalesInvoiceLine	Item	PromotionProgram	Parameters	Analysis
