Chapter09.sql

10

-- Tutorial 9.1: the columns that identify each account

11

SELECT AccountID, AccountNumbr, AccountName,

12

AccountType, AccountSubType

13

FROM Account;

Execution finished with errors.
Result: no such column: AccountNumbr
At line 11:
SELECT AccountID, AccountNumbr, AccountName,

The message pane turns red and names the column it cannot find, at the line where the statement starts. The result grid between the editor and the pane is not shown.
