DAX query view of the model editor after Run, with the query of Exercise C.1, Step 3: one row for each fiscal quarter of the three years, ordered by year and period. Outlined: the four rows of fiscal 2026, which are the Expected results. The four quarters' lines, revenue and list amount add to the year's; their discounts, each rounded to the cent, add to $362,110.74, a cent below the year's $362,110.75. The grid shows the values as the query returns them, without the measures' format, and cuts a long header with an ellipsis. Key Measures heads the Data pane because its only column, Column1, is hidden; its measures are listed alphabetically.
