Brookside Collection Promotion, fiscal 2025: its recorded dates against the orders and the budget

The budget planned 88.1% of list in March and April, against at least 92.7% in the months with no promotion, so it planned a discount when the promotion ran; November is a little lower in every budget, the segment promotion's month. The recorded end date, then, looks like a wrong entry, not discounts given outside the window. Promotions 1 and 7 show the same pattern. The axis starts at 86%.
