

Requirements 2 to 5 each supply the section named in their perspective, and the arrows into a section show which requirements it draws on. Requirement 6 writes the opening and the recommendation and assembles the appendix. Requirement 2 makes Exhibits 1 and 2, Requirement 3 makes Exhibit 3, Requirement 4 makes Exhibit 4, and Requirement 5 makes Exhibit 5. Requirement 1 supplies no section: it is the file every exhibit is read from, and its Tests tab is what the memo's report controls rest on.
