Year-end measures against the versions on the year's average balance

Year	DSO	DSO on Average Balance	DIO	DIO on Average Balance	Materials Days	Materials Days on Average Balance	DPO	DPO on Average Balance
2024	62.2	33.5	229.9	201.6	29.3	76.7	118.4	85.3
2025	54.9	56.3	311.7	260.3	158.1	94.6	106.2	99.2
2026	54.9	54.5	469.8	384.0	422.1	288.9	98.9	92.8

Report view, page Working Capital, with the slicer saved on the cycle and the Year filter on the 3 years of the window, so the axis starts at 2024-Q4, the first quarter-end with twelve months behind it, and ends at 2026-Q4, Data Through. Outlined in teal: the days of supply, with the icons the matrix saves, against the policy targets of 28 days: an up arrow from 1.25 times the target, a down arrow at 0.8 or below, a circle between them. Only the materials of 2024-Q4 sit in that range; every other cell carries the up arrow. The tooltip page, hidden, and the page's text box are not drawn; total rows are not drawn.
