Materials received by channel (columns) and issued (line), by month

Materials by year and channel

Year	Supply Plan Receipts	Shortfall Receipts	Materials Received	Materials Issued	Materials Build
2024	5,681,207.72	2,141,872.90	7,823,080.62	10,560,905.25	-2,737,824.63
2025	7,017,928.00	6,472,674.93	13,490,602.93	10,005,081.44	3,485,521.49
2026	6,358,142.79	11,219,993.21	17,578,136.00	10,161,204.64	7,416,931.36

The supply plan alone stays below use. Its receipts are under the issues of every year, and the shortfall channel's grow, 2,141,872.90 to 11,219,993.21.

The build of fiscal 2026 by item group and item

	Materials Build
– Raw Materials	**7,422,525.85**
RAW-CTN-0010	2,959,318.29
RAW-LED-0005	1,153,243.40
RAW-LIN-0008	1,134,217.41
RAW-LIN-0002	797,202.63
RAW-LIN-0006	549,623.46
RAW-LIN-0004	521,297.17
RAW-CTN-0007	120,438.07
RAW-WVN-0011	112,440.32

Who approved the requisitions of each channel

	Requisition Count	Self-requested
– Other	**6**	**0**
Chief Financial Officer	4	0
Purchasing Manager	2	0
– Supply plan	**3,921**	**0**
(Blank)	6	0
Chief Financial Officer	3,915	0
– Work-order shortfall	**21,437**	**351**
Production Manager	21,437	351
Total	**25,364**	**351**

Six raw materials make up 95.9% of the 2026 build, 7,416,931.36. RAW-CTN-0010 alone is 2,959,318.29.

One approver for the whole channel. The Production Manager approved all 21,437 shortfall requisitions, 351 of them requested by the same employee.

Report view, page Materials Build, filtered to the 3 years of the window (the build matrix to 2026). Columns and line share one axis here, because their ranges overlap. The build matrix is sorted by the build, groups and items alike, and scrolls: its first 9 of 24 rows are drawn, with the other raw materials, the Packaging group and the total below. Outlined in teal: the six items at the top. Matrix rows sort by name; total rows of the tables, the requester table and the page's text box are not drawn.
