Demand Planning and MRP				**main**			1 of 6

main The group's tables carry the evidence the model answer is built on.

support Named in the answer for one point: a lookup, a check or a second source.

Accounting Core is the main evidence in 5 of 6 exercises and Order-to-Cash (O2C) in 3. Master Data appears only as support. No exercise draws on Fixed Assets and Financing. A filled cell marks a group, not a count of tables: it can stand for one table or for six. Rows are the groups of Table 1.3; tables it does not list, such as the line tables and the work center tables, are placed by the dataset documentation.
