

Adding BudgetLine to Budget counts the first band twice: Budget already holds its sum. Compare at the grain of Budget, or aggregate BudgetLine to that grain first, and keep the second band as a "No cost center" bucket.

Counts are for fiscal 2026. Across all years BudgetLine has 1,625 rows with no CostCenterID, 672 operating expense and 953 balance sheet, which is the count Step 4 reads.
