

1 The circle: a ledger row has at most one cost center and may have none. 115,623 of 815,921 ledger rows have a blank CostCenterID, mostly on balance sheet accounts, so a report by cost center leaves them out. Every Budget row names a cost center.

The same column in both tables — A foreign key within a table group — A foreign key to another group

Month in Budget and FiscalPeriod in GLEntry hold the same month number under two names. To compare the two, sum the ledger to the four columns after leaving out the year-end close entries, then set it beside BudgetAmount.
