337	336	TRK202400000336	In Transit	2024-03-05

740 of 9707 records found

Amber rule: the TrackingNumber is blank

Coral rule: In Transit, and a DeliveryDate before ReviewDate

Row 50 meets both rules and shows amber, the rule listed first in Manage Rules, so the colors cannot count the shipments in both categories. COUNTIFS does. The Status filter is set to In Transit by the slicer.

Delivered

In Transit

Parameters | **Analysis** | Shipment

Two views of one workbook, side by side. Left: columns B to F and J to K of the Shipment Table are hidden, and the first 14 In Transit shipments are shown. Right: rows 1 and 2 are scrolled out of view. The review date is 2026-12-31, the last day of the extract. Outlined: the three exception counts, and the SUBTOTAL cells, which agree with the counts for the status selected.
