

Order SO-2026-003887: two shipments

SalesOrderID	ShipmentDate
3887	2026-01-31
3887	2026-02-05

The four tables are all in the Order-to-Cash group, so every relationship is a solid gray line. A lookup from a line to its invoice, or from an invoice to its order, finds exactly one row. An order can have several invoices (5,209 do) and several shipments (3,186 do), so a lookup of the order's shipment date returns the first of them, 2026-01-31, and not 2026-02-05, without a message.
