Ex 6.3 | **Ex 6.4** | Ex 6.5

Selected: B40, the check, which reads zero in both columns. Outlined: the cost effect by product type, +$43,345.66, where Tutorial 6.3 reads zero because every item has one standard cost. The two columns share the margins, the change and the volume effect; price lists and promotions together make the Furniture-level price (+$1,073.25 and −$120,687.02).
