Margin of the four product lines, fiscal 2026 (Total column of the BudgetReport worksheet)

A margin (a total) A variance, signed: the minus sign says it lowers the margin

Drawn to scale from zero. The sales-volume variance is 27 times the price gap and the discounts together, which add up to the flexible-budget variance (−$1,281,870), so those two bars are slivers. The budget plans 3.5 times the units sold.
