SELECT si.InvoiceNumber, si.InvoiceDate, gl.PostingDate,

Outlined: InvoiceDate. All three invoices are dated before the year, 2025-11-29 to 2025-12-04, and all post on 2026-01-01, so the ledger counts their $4,582.37 in the year and the invoice lines, selected by InvoiceDate, count it in the year before. The three amounts add up to the difference of the previous figure; Exercises 5.2 and 6.1 decide, from the shipments, which side is right.
