Result: 4 rows returned
At line 8:
SELECT gl.GLEntryID, gl.PostingDate, a.AccountNumber,

Outlined: the SourceLineID of the revenue posting, 10645, the line of the invoice that posted 4010. The other three rows (1020, 4050, 2050) are NULL, because the receivable, the freight and the tax belong to the invoice header, not to a line. The four rows balance: debits and credits are each $787.48, the invoice's GrandTotal.
