Ex 10.2.sql

```
71  -- Requirement (3): anti-join, postings whose SourceLineID matches no invoice line
72  -- Population: the 9,525 postings above; expected: no rows
73  SELECT gl.GLEntryID, gl.PostingDate, gl.VoucherNumber,
74     gl.SourceLineID, gl.Credit
75  FROM GLEntry AS gl
76     LEFT JOIN SalesInvoiceLine AS sil
77        ON sil.SalesInvoiceLineID = gl.SourceLineID
78  WHERE gl.SourceDocumentType = 'SalesInvoice'
79     AND gl.FiscalYear = 2026
80     AND gl.SourceLineID IS NOT NULL
81     AND sil.SalesInvoiceLineID IS NULL;
```

	GLEntryID	PostingDate	VoucherNumber	SourceLineID	Credit

Execution finished without errors.
Result: 0 rows returned
At line 73:
SELECT gl.GLEntryID, gl.PostingDate, gl.VoucherNumber,

Outlined: the empty grid, the column headings with no rows, and the pane below it reports 0 rows returned. The test covers the 9,525 postings of the year that carry a SourceLineID (Step 6): every one points to an existing invoice line. An empty result is a result, and it runs in one direction only: it does not show that every invoice line was posted, that the amounts agree or that the documents are genuine.
