**Each month and the trailing twelve months, 2024-12 to 2026-12**

Peak of the trailing total: 1.54 in 2026-10

Provisional month, drawn with hollow points

*The monthly ratio swings from 0.89 to 1.95, while the trailing total moves from 1.18 to its peak and ends at 1.51. In 2026-11 the monthly ratio fell by 0.94, from 1.86 to 0.92, and the trailing total moved by 0.01: the trailing figure is steady and slow to react. The first window includes the start-up month of January 2024. The axis starts at zero.*
