Ex 11.1.sql

```
437 -- Requirement (5), step 2: the view in statement order, sorted by a CASE expression
438 -- Population: the view; expected: seventeen lines in statement order
439 SELECT StatementLine, Amount
440 FROM Ex11_1_IncomeStatement
441 ORDER BY CASE StatementLine
442     WHEN 'Operating revenue' THEN 1
443     WHEN 'Contra revenue' THEN 2
444     WHEN 'Net revenue' THEN 3
445     WHEN 'Cost of goods sold' THEN 4
```

	StatementLine	Amount
1	Operating revenue	29973822.48
2	Contra revenue	-242764.56
3	Net revenue	29731057.92
4	Cost of goods sold	-18634303.63
5	Gross margin	11096754.29
6	Operating expenses	-6471696.58
7	Operating income	4625057.71
8	Other income and expense	-121446.47
9	Net income	4503611.24
10	Current assets	37236780.57
11	Fixed assets	4354000.0
12	Contra fixed assets	-2262256.46
13	Total assets	39328524.11
14	Current liabilities	13507123.75
15	Long-term liabilities	389304.68
16	Equity	20928484.44
17	Liabilities, equity, and net income	39328524.11

Execution finished without errors.
Result: 17 rows returned
At line 439:
SELECT StatementLine, Amount

Outlined: Net income, $4,503,611.24, the credit of JE-2026-000297 to retained earnings, and Total assets, $39,328,524.11, which equals the last line, liabilities, equity, and net income. The 17 lines come back in statement order because the CASE in ORDER BY numbers each label from 1 to 17. The editor is scrolled to the top of the query and shows the first 4 of its 17 WHEN branches; the rest continue below.
