Outlined: the first row, JE-2024-000001, the opening entry, $13,817,192.58, posted 2024-01-01, score 4: it fails four of the five tests (Weekend, Backdated, SelfApproved, AboveLimit). The other seven entries score 2 and are ranked by amount; no entry scores 3, so no row has that score. A flag is a reason to look, not a finding. The result is wider than the window, so the flag columns are drawn after scrolling right; the editor is scrolled to the foot of the query.
