Outlined: the NetEffect column, revenue received from the year before, less revenue moved on, less revenue never billed: -$90,138.93 in 2024, +$70,598.07 in 2025 and -$24,940.25 in 2026. A negative figure is revenue recorded below the year's deliveries. The last sign comes from the unbilled shipments: without them 2026 would read +$19,540.86. The editor is scrolled to the foot of the query: the end of the Effects CTE and the final SELECT.
