Proved by the Checks tab	
Exercise 15.1 The two loss entries of the subtype with their dates and amounts, every posting of each entry, and the entries a page lists with no year filter	**18** rows
Exercise 15.2 The net income of each month, the running sum of the measure Net Income YTD, the figure at June and at July with the table filtered, and the two lowest months	**28** rows
Exercise 15.3 The three plant measures for each year, the manufacturing labor cost and the straight-time rate, and the order of the parameter's fields	**16** rows
Exercise 15.4 The break-even lift at the default and at each of the five discounts, the units, price and cost per unit, and the smallest and largest value of the Discount table	**13** rows
Exercise 15.5 The actual revenue of the last quarter and of each of its months, and the error of two benchmarks, the mean and the same quarter last year	**10** rows
Exercise 15.6 The lines on both paths and the lines that disagree, by year, the hours in each cell of the work-center matrix, the shares recorded after the operation ended and the lines that cannot be tested	**34** rows

Visible only in Desktop

The drill-through click The Drillthrough option of the right-click menu, the filters a click passes and the back button, which responds only with Ctrl held
Tutorial 15.1, Steps 7 and 9; Tutorial 15.2, Step 8; Exercise 15.1

The visual calculations The YTD and Change columns of Exercise 15.2, the RUNNINGSUM of Tutorial 15.2, Step 10 and the moving average of Tutorial 15.3, Steps 8 and 9. They are computed inside the visual, so no row of the Checks tab can read them: compare them by eye
Tutorial 15.2; Tutorial 15.3; Exercise 15.2

The field-parameter slicer Whether the slicer changes the measure the chart shows, and what Desktop does when the parameter is tried as a drill-through field
Exercise 15.3, Requirements 3 and 5

The Analytics-pane forecast Desktop computes it, and a new release can move it: grade the audit note, not the value
Exercise 15.5

The Checks tab of the model answer holds 268 rows for the tutorials and exercises of the chapter (383 with the sections of Chapters 13 and 14). Choose Home > Refresh, then Run. A row is proof of a value, not of how a visual looks: the right-hand column is for the instructor to open the pages.
