Plant Measure

- ☐ Hours per Standard Hour
- ☐ Overtime Share
- ☑ **Labor Cost per Standard Hour**

One chart, three measures. Each entry of the slicer is a field of the Plant Measure parameter. With Labor Cost per Standard Hour chosen, the columns show that measure for each year; another entry swaps the measure and keeps the years.

The plant measure chosen in the slicer, by year

The three measures by year (requirement 3)

Year	Hours per Standard Hour	Overtime Share	Labor Cost per Standard Hour
2024	1.18	11.6%	33.18
2025	1.41	16.7%	40.71
2026	1.51	19.8%	44.21

A slicer that allowed several entries would put the cost, 44.21, on the same axis as the share, 0.198: about 223 to one, and the share's columns would vanish.

Ex 15.2 | **Ex 15.3** | Ex 15.4 | +

Report view, page Ex 15.3, with the slicer saved on Labor Cost per Standard Hour and the years 2024 to 2026. Outlined in blue: the selected entry, and in the table the column the chart shows. The table holds the three measures for each year, as the Expected results list them. Total rows are not drawn, and neither is the page's text box.
