The lift in volume at which the promotion breaks even, by discount, against the lifts the Part II case measured

Each point is the Break-even Lift of the model answer at a whole-number discount, from 561.74 units, $416.23 price before discount, $215.99 standard cost a unit and a commission rate of 1.903%. Markers: the five discounts of Requirement 4; the larger one is the 12 percent the promotion ran at. The band is the lowest to the highest lift of the Part II case's 9 promotions; the lift is a condition, not a forecast.
