Direct hours of 2026: operation's work center (rows) against the time clock's (columns)

	Assembly	Cutting	Finishing and Test	Packing	Quality Assurance
Assembly	11,122.8	558.8	698.3	295.5	101.7
Cutting	573.9	3,696.8	295.0	235.0	55.4
Finishing and Test	1,354.8	627.0	8,101.6	309.9	86.8
Packing	**4,325.8**	1,689.9	2,311.9	24,413.5	285.9
Quality Assurance	420.8	86.7	316.8	102.9	674.9

Direct lines of 2026 by whether the paths agree, and the share recorded after the operation ended

SameWorkCenter	Path Lines	Share After Operation End
False	3,137	71.5%
True	10,768	33.2%
(Blank)	8	

The disagreement is concentrated in the late time of Chapter 12. Of the 3,137 lines on which the paths disagree, 2,243 (71.5%) were recorded after the operation ended; of all 13,913 direct lines, 5,823 (41.85%).

Report view, page Ex 15.6, direct manufacturing time of 2026, the matrix's row and column headings sorted by name, without the words Work Center that every name ends with. Outlined: the diagonal, where the operation's work center and the time clock's agree. Highlighted: Packing operations clocked at Assembly, 4,325.8 hours, the largest cell off the diagonal; 26% of the hours of Packing operations are off it. In the table, True and False read the test SameWorkCenter, and the blank row is the 8 direct lines with no operation, which cannot be tested. Total rows and columns are not drawn, and neither are the other visuals and the text box of the page.
