Report view, page Ex 16.3, with the Year filter on the 3 years of the window, so the axis ends in 2026-12 and not in the empty months of the Date table. A month with no surge day has no column and leaves a gap in the line. The first surge day is 2024-05-31, the only one of 2024-05; the outlined month, 2026-10, has the most, 7. The table shows Desktop's total row; the page's text box is not drawn.
