113	13	0
Pairs	Pairs Within 30 Days	Pairs on the Same Invoice

None of the 113 pairs pays one invoice. The card reads 0 and not blank, because the measure adds 0. Two payments of one supplier and one amount on different invoices are an anomaly to look at, not a duplicate payment.

Near-duplicate pairs by days apart

Documents approved, and their share of each process

EmployeeName	JobTitle	Entries Approved	Entries Share	Orders Approved	Orders Share	Registers Approved	Registers Share
Cynthia Reyes	Chief Financial Officer	43	5.05%	18,817	99.92%

Ex 16.5 | **Ex 16.6** | Notes | +

Report view, page Ex 16.6, with the table sorted by Orders Approved, largest first; a measure with nothing to count is blank, and the total row adds every approver. Outlined: the Chief Financial Officer's orders, 99.92%, and the Accounting Manager's registers, 100.00%. Desktop sets the table to the right of the cards and the chart; the mock stacks the three. The page's text box is not drawn.
