

The upper strip is to scale from 2024-01-01 to 2027-02-23; the lower strip enlarges 2026-12-01 to 2027-03-01. Payroll posts through 2026-12-18, 13 days before the last year-end, and the ledger runs 54 days past it with supplier payments alone, so a balance at the ledger's last date is not a year-end balance. The data-through date is the last year-end itself, where the last pair of closes sits.
