	Rows 1 to 3: the title and the note on the memo				
4	**Family**	**What to do**	**Annual effect**	**One-time cost**	**What the decision depends on**
5	FUR-BNH	Buy, only with the crew reduced in step (about 1.5 positions); otherwise keep making it and raise its price 9.2%	79,249	32,443	The production manager's decision to reduce the crew; quality against the 1.5% defect credit; lead time and the 80% minimum; the price after 2029
6	FUR-NGT	Buy, only with the crew reduced in step (about 3.2 positions); otherwise keep making it and raise its price 5.1%	67,149	53,067	The production manager's decision to reduce the crew; quality against the 1.5% defect credit; lead time and the 80% minimum; the price after 2029
7	FUR-TBL	Buy, only with the crew reduced in step (about 5.9 positions); otherwise keep making it and raise its price 5.3%	109,084	87,150	The production manager's decision to reduce the crew; quality against the 1.5% defect credit; lead time and the 80% minimum; the price after 2029
8	FUR-SDB	Make; raise its price 2.4%	50,779	0	Buying loses money with the crew kept (-252,392 a year) and reduced (-26,237); the increase can lose 4.5% of volume
9	LGT-SCN	Make	0	0	Buying loses money with the crew kept (-191,571 a year) and reduced (-16,917)
10	TXT-PIL	Make	0	0	Buying loses money with the crew kept (-59,222 a year) and reduced (-35,404)
11	FUR-BKC	Raise its price 7.0% to the floor	80,662	0	Volume loss below 12.7%; a new, approved price list with an end date
12	FUR-CTB	Raise its price 3.3% to the floor	81,312	0	Volume loss below 6.1%; a new, approved price list with an end date
13	LGT-CHD	Raise its price 4.9% to the floor	33,558	0	Volume loss below 9.2%; a new, approved price list with an end date
14	Total annual effect	501,792			
15	Total one-time cost	172,660			
	Rows 16 to 23: the model memo, in five paragraphs				

Standards | **Memo** | ItemCosts

Outlined in teal: the three families to buy, only with the crew reduced. In blue: the three to make. In coral: the other three families below the floor, which only need a price. The totals are the path that buys and reprices the rest: an annual effect of 501,792 and one-time costs of 172,660 (severance and tooling); the formula bar adds column C. Two of the three make rows carry no effect, because their families are at or above the floor.
