C6 | *fx* | =SUMPRODUCT(XLOOKUP(Activity[Family],'Make or Buy'!$A$10:$A$15,'Make or Buy'!$P$10:$P$15,0),Activity[CuttingRun]+Act…

Rows 1 to 3: the title and the note on the freed hours

Hours freed by buying FUR-BNH, FUR-NGT, FUR-TBL (the base year's completions)

Work center	Routing time used	Freed by buying	Used after buying	Practical capacity	Use of practical capacity, before	Use of practical capacity, after
Cutting	12,314	3,884	8,430	20,524	60.0%	41.1%
Assembly	34,436	7,607	26,829	44,142	78.0%	60.8%
Finishing and Test	19,065	4,596	14,469	24,187	78.8%	59.8%
Packing	7,648	1,708	5,941	11,047	69.2%	53.8%
Quality Assurance	360	0	360	3,166	11.4%	11.4%
Plant	**73,823**	**17,795**	**56,028**	**103,067**	**71.6%**	**54.4%**

Rows 13 to 42: the comparison with the unused capacity, the crew-kept case, the headroom table and the model answer

Make or Buy | **Capacity** | Growth 40%

Outlined in coral: the Plant row, whose use of practical capacity falls from 71.6% to 54.4% when FUR-BNH, FUR-NGT, FUR-TBL are bought. Outlined in teal: Quality Assurance, which frees nothing, because none of the three families is routed through it. The formula bar shows the first freed cell, a SUMPRODUCT over the Activity Table weighted by whether the family is bought; the use columns divide by the practical capacity of column E.
