The revaluation of the finished goods on hand at each year-end, against that year's materiality screen

A revaluation above its screen

A revaluation below its screen

The year's materiality screen, 5% of income before income taxes as recorded

Each bar is the revaluation of the manufactured finished goods made since the ledger opened and on hand at the year-end, as the movements rebuild them: at the proposed rate, with no indirect hours (the labor-content case) and with supervision and depreciation spread over 90% and 110% of the plan volume. The screens are 256,718 for fiscal 2025 and 225,181 for fiscal 2026; the revaluation is a sensitivity on next year's plan, not an established error.
