

Each card is a requirement of the case, in the order of its three phases; the tags name the tools it uses (Requirement 9 is a written report built on the workbook). The teal boxes are the three milestones an instructor may collect and check. Arrows show how results move: Copy with Headers from the script into the workbook, the refund flags exported to CSV from the script into the Power BI report, Chapter 16's register into the updated monitoring file, and the workbook, the report and the register into the committee's report.
