

Refund RF-2025-000081 of 246.58 is the first of the 7 refunds that the last-application reading counts and the last-receipt reading does not (the 58 and 51 of Requirement 4) whose invoice has two receipts applied a day or two after each. Its credit, CM-2025-000221, was approved before the second receipt and posted to 2060, so the refund can come before the payment it depends on. No table holds the date a payment cleared the bank, so none of the three readings can say when the money was usable.
