Return rate by month of the credit and by month of the shipment

7	28.3	74	27	30,304.99
Fewest Days after Shipment	Average Days after Shipment	Most Days after Shipment	Lines Returned in a Later Year	Credits Returned in a Later Year

Return rate by year

Year	Return Rate	Return Rate by Ship Date
2024	0.533%	0.606%
2025	0.685%	0.726%
2026	0.816%	0.794%
Total	**0.682%**	**0.711%**

Fiscal 2026 by month of the shipment

Year Month	Credits by Ship Date	Revenue by Ship Date	Return Rate by Ship Date
2026-01	22,759.87	2,593,412.09	0.878%
2026-02	11,524.80	2,147,535.09	0.537%
2026-03	12,902.48	2,509,673.39	0.514%
2026-04	14,358.02	2,326,284.27	0.617%
2026-05	18,181.35	2,574,281.53	0.706%
2026-06	27,768.73	2,495,080.33	1.113%
2026-07	29,826.65	2,201,327.84	1.355%
2026-08	21,012.50	2,375,924.01	0.884%
2026-09	24,411.87	2,405,040.60	1.015%
2026-10	23,069.55	2,207,816.73	1.045%
2026-11	19,363.20	2,388,554.06	0.811%
2026-12	1,266.51	2,303,187.65	0.055%
Total	**226,445.53**	**28,528,117.59**	**0.794%**

Returns | **Timing** | Concentration | +

Report view, page Timing, drawn here in a different arrangement (the model answer's page also holds a text box with the written answer, not drawn). Blue circles: the rate by the month of the credit, 0.040% in 2024-01, the first month of the first year, which had nothing earlier to return. Amber diamonds: the rate by the month of the shipment, which falls to 0.055% in 2026-12 (outlined in coral, with its row in the table) against 0.514% to 1.355% for the other months of 2026, because the returns of the last shipments arrive after the data end. The tables show 0.682% overall by the credit date against 0.711% by the ship date, whose revenue leaves out the 439 lines that never ship.
