

1. The cell

Revenue by ItemGroup and YearQuarter		
ItemGroup	2026-Q3	2026-Q4
Accessories	461,242.22	502,092.01
Furniture	4,283,322.86	4,156,787.84
Lighting	1,472,670.82	1,414,160.86
Services	268,141.25	363,913.55
Textiles	782,586.16	850,233.42

2. Its filters

Item
ItemGroup = Furniture

Date
YearQuarter = 2026-Q4

3. The lines that remain

SalesInvoiceLine
27,933 lines in all
864 Furniture lines invoiced in 2026-Q4

4. The measure

SUM (SalesInvoiceLine[LineTotal])
= 4,156,787.84

The row and the column of the cell become filters on the Item and Date tables; the relationships carry them to the invoice lines, and the measure adds up the lines that remain. A slicer on the page would add its own filter in the same way.
