

The six stages of the analytics workflow (Chapter 1), and what the case completes or begins

1 Define the Question	2 Identify and Access the Data	3 Prepare and Clean the Data	4 Analyze the Data	5 Visualize and Present the Results	6 Communicate Findings and Recommendations
Requirement 1	Requirement 2	Requirements 3 to 5	Requirement 5's margins, then the diagnosis in Part II	The appendix's map and table, then the charts in Part II	Requirement 6, readiness findings only

Completed in the case | Begun in the case, finished in Part II | → The main input of a part of the memo

The arrows show the main source of each part. The Requirement 6 guide lists every source: the Auditing section also draws on Requirements 2 to 4, and the Managerial accounting section on Requirement 2.
