R4 Budgets | **R5 Controls** | Memo

Outlined in coral: the count outside the recorded dates for promotions 1, 4 and 7, which equals their line counts. Outlined in teal: the two lines of promotion 1 outside their scope. Every other count is zero. For a promotion whose lines all fail the date test, the window is the calendar months in which they were ordered, a provisional test, because its recorded dates hold no order line of its scope. Columns B and C, the promotion's name and its kind of scope, are hidden.
