Execution finished without errors.
Result: 18 rows returned
At line 168:
SELECT ae.AttendanceExceptionID, ae.ExceptionType, ae.WorkDate,

The grid is scrolled right, so its row numbers are the AttendanceExceptionIDs. Outlined: exceptions 2, 3, 8 and 9, which name employee 86 on clock entries that belong to employee 85: the report misattributes its own rows, and none carries another date. The others are 11 isolated and 3 paid on a Pending entry.
