

The last two pay periods (2026-12-14 to 2026-12-31) are marked Open and have no registers, so payroll stops at 2026-12-18. A Data Through that followed payroll would fall before the year-end and blank the last quarter.

263 supplier payments of 2026's invoices, 271,327.17 in 526 ledger rows: the only postings after the year. Cash reads 8,442,255.80 at the year-end and 8,170,928.63 at the last posting, a fall of 271,327.17 that only means the data stop.

One axis from December 2026 to the end of February 2027. 2026-12-31 is the earliest of the last posting dates of SalesInvoice, CashReceiptApplication, PurchaseInvoice, GoodsReceipt, MaterialIssue, Shipment and DisbursementPayment: six documents end on that day and supplier payments run on to 2027-02-23. Payroll liability remittances post until 2026-12-30, but the last payroll posting is the last PayrollSummary or PayrollPayment. Data Through is a bound observed in the extract, not proof that no document before it is missing.
