Rows 39 to 41: empty

42	**Evaluation rule, written before testing: the upper deviation limit for zero to three deviations**		
43	**Deviations found in the sample**	**Upper deviation limit**	**Supports reliance at the tolerable rate?**
44	0	4.95%	Yes
45	1	7.79%	No
46	2	10.29%	No
47	3	12.62%	No
48	Rule: rely on the control only if the upper deviation limit is at or below the tolerable rate; at n = 59 that means no deviation at all. The rule runs past wh…		

Rows 49 to 148: the frozen draw of 59 refunds, D1 applied to the draw and to the population, A3 on its own population, and the model answer

Materiality | Risks | Tests | **Sample** | Timeline

Outlined in teal: the six named parameter cells, each with its name in the tag beside it (the Name Box shows B15's, whose formula reads the size from the table by two lookups). In coral: the cells the plan reads, a size of 59 at 95% confidence, a 5% tolerable rate and no expected deviation, 0 deviations allowed, and the only row of the rule that supports reliance. In blue: why each of the 7 key items is key (6 are customer 128's, whose refunds total 26,315.10) and the rows of the rule whose limit is above the tolerable rate. Long labels are cut and columns narrower than the workbook's.
