1. R Square: the month index explains about 17 percent of the variation in monthly revenue.
2. Significance F: with one X variable, the same p-value as the slope.
3. The slope: the average change in revenue from one month to the next along the fitted line.
4. The slope's p-value, below 0.05 here. Without the start-up month it rises above 0.05.
