```
387 -- Tutorial 11.3: the view for fiscal 2026
388 SELECT *
389 FROM MonthlyLaborEfficiency
390 WHERE Month BETWEEN '2026-01' AND '2026-12'
391 ORDER BY Month;
```

	Month	HoursPerStandardHour	TTMDirect	TTMIndirect	TTMTotal	TTMOvertimeShare
1	2026-01	1.71	0.88	0.56	1.44	0.171
2	2026-02	1.76	0.88	0.56	1.44	0.172
3	2026-03	1.95	0.9	0.55	1.46	0.177
4	2026-04	1.61	0.92	0.55	1.46	0.181
5	2026-05	1.41	0.87	0.57	1.45	0.175
6	2026-06	1.34	0.91	0.56	1.47	0.183
7	2026-07	1.74	0.91	0.59	1.51	0.186
8	2026-08	1.5	0.93	0.57	1.49	0.189
9	2026-09	1.55	0.92	0.57	1.49	0.191
10	2026-10	1.86	0.96	0.58	1.54	0.196
11	2026-11	0.92	0.93	0.6	1.53	0.194
12	2026-12	1.03	0.94	0.57	1.51	0.198

Execution finished without errors.
Result: 12 rows returned
At line 388:
SELECT *

Outlined: the trailing twelve-month columns, which change slowly while the monthly ratio swings. The December row is provisional, because its direct time and output run to December 11, 2026, and its indirect time to December 4, 2026.
