With CALCULATE ([Revenue], ALL (SalesInvoiceLine)) as the denominator instead, Furniture's share reads 20.12% and the five shares add up to 34.42%. Removing the filters from the fact table removes the year as well.

The table visual on the Margins page of Tutorial 14.2, with the year slicer set to 2026. Outlined: Furniture Revenue, the same on every row because its filter replaces the row's item group. Share of Revenue removes the filter on Item and keeps the year.
