

Plan A, Plan B and Plan C are the plans of the Teaching approaches below. Teal: students work in the service; amber: the instructor shows it; gray: students use Desktop. A Pro license matters only for the version history of Exercise C.3, and a tenant setting beats a license. Before the term, test the second question with a student-licensed account, not an instructor account: the upload and Choose data, Power Query's Save, Editing, DAX Run, a report save, and version history if Exercise C.3 is assigned.
