

One scale for both panels. Recording both accruals adds 383,044.82 of expense and removes 365,921.19, so 2026 income moves only 17,123.63. The liability at the year-end carries the whole 383,044.82: 365,921.19 of it falls on opening retained earnings and 17,123.63 on 2026 income. Manufacturing's part of each amount is taken as a cost of the period.
