149 of 851 records found

Filtered to the entries whose ReversesJournalEntryID is filled; the first 10 of 149 are shown, all of type Accrual Adjustment. Columns E, G, I and J (Description, the creator and the approver) are hidden. CreatedDate's number format is changed to yyyy-mm-dd hh:mm:ss (the workbook shows it as a date). Outlined: CreatedDate, whose time, 08:00:00 on every row, is when the entry was created, not when it was posted, and ReversesJournalEntryID, the JournalEntryID of the earlier accrual that the entry adjusts. Blue row numbers mark a filtered Table.
