Selected: B5, whose formula shows in the bar; B6 uses the same SUMIFS on CreditMemoLine. Outlined: the count of lookups not matched, zero. Net revenue is billed less credits, in bold. The last row moves only the credits of the 14 credit memos for invoices of earlier years, all dated in January (13,289.90 of Furniture credits), out of 2026: the first quarter rises and the others do not change. A full view by the invoice's quarter would also move credits between the quarters of 2026.
